Screen your dreams

SCREEN THE FUTURE

LED display solutions for control rooms

Inspiring screens for anticipating the future

Professionals dedicated to controlling and monitoring, and even directing remote operations, need visual media that faithfully reproduce all actions to make the best decision in real time.

High-definition screens are crucial when delivering an accurate and reliable visual experience can make all the difference in critical decision-making environments where there is no room for failure.

INFiLED display solutions are ready to monitor all kinds of information in perfect detail and have been designed to be operative 24/7 offering clear and crisp visuals, as well as taking care of the visual health of operators.

Screens and professionals united to control

Screens are monitoring points both for controlling and commanding, helping us to take care of our operations and assets.

Access the most reliable information

INFiLED displays are the most reliable canvas for ensuring you do not miss any detail.

Traffic control

Traffic control solutions require 24/7 reliability and superior image quality that ensures clear and reliable visualisation of data.

Telecom & IT

This type of control room serves to continuously monitor the performance of the network and to identify and resolve any issue to ensure optimal service. A reliable solution and flexible installations can connect to different technologies and allow multiple display configurations.

Command control room

Bright and crisp displays are essential tools that increase the visibility of critical data and improve interpretation, speed and effectiveness of action.

Control the present to anticipate the future

INFiLED displays are the best canvas for creating inspiring immersive experiences for everyone.

Telecom & IT

This type of control room serves to continuously monitor the performance of the network and to identify and resolve any issue to ensure optimal service. A reliable solution and flexible installations can connect to different technologies and allow multiple display configurations.

Energy and utilities

In these environments, reliable display technologies ensure smooth and continuous operation and minimise downtime. Control rooms for energy facilities include real-time process control for power generation and distribution.

Manage the details

At INFiLED we place technology at the service of decision-makers with 24/7 reliable and efficient display tools to help minimise human errors.

Immersive experiences

The special needs of control rooms require reliable display solutions that allow controllers and commanders to feel comfortable and concentrate. Orchestrate your screens to create your own immersive control centre.

High visual performance

All INFiLED solutions offer the highest performance in the visual reproduction of content and an extremely comfortable viewing experience, being the ideal medium for monitoring operations.

Flexibility

Easy installation, easy set-up and easy operation, all there to improve professional and end-user display needs. Technology allows for the development of tailor-made display solutions that adapt to all kinds of retail spaces.

Sustainability

Aware of the need for sustainable development, at INFiLED we work on more energy-efficient solutions.

Excellent thermal management of all the display's electronic components allows faster heat dissipation and energy saving, extending its service life.

If you need it, you can display it

INFiLED screens can be adapted to any control-room needs, offering maximum reliability and high-performance display solutions that ensure continuous fail-safe operation.

Visual accuracy

Customised screens with excellent visual performance, high refresh rate and outstanding colour expression.

Flexible design

Modular compositions can be adapted to the specific needs and formats of each control room.

Energy saving

The updated generation of the INFiLED series features 20% lower power consumption. Energy saving in all-day operating displays, extending their life span.

Create the best visual medium to transform information into knowledge, improving and strengthening decision-making in critical situations.

Easy maintenance

Easy access for maintenance and removing and repairing any damaged LED module.

Comfortable & silent

Low heat dissipation and zero noise make it ideal for work environments and concentration.

Long life

Excellent thermal management of all electronic components dissipates heat and extends its service life.

Showcase your world in infinite ways

Outstanding high-accuracy display solutions for a wide array of applications in all kinds of control rooms.

WP SERIES

WP series is INFILED's flagship fine pixel pitch, ultra-thin, high-resolution digital LED display.

The all-in-one design is the perfect solution for any installation requiring ultra-high definition.

With a panel ratio of 16:9 and pixel pitch ranging from 0.9 mm to 3.1 mm, configurations of 2K, 4k, and 8K resolution displays can be easily achieved.

Ultra-thin with integrated controller and standard 16:9 aspect ratio. Optional power redundancy.

Indoor applications

With an ultra-thin edge thickness of just 29.5 mm, lightweight modules, and an intuitive slim-line mounting system, the WP series saves space for demanding environments.

The WP series features front service modules for efficient hassle-free maintenance, resulting in minimal screen downtime. The innovation service tool ensures the panel is protected during maintenance.

Pixel Pitch	0.9, 1.2, 1.5, 1.8, 2.3, 2.5, 3.1mm
Brightness	600 - 1,500nits
Cabinet size (WxHxD)	600x337.5x29.5mm, 300x337.5x29.5mm

WP WRAP

The WP Wrap series is a 120° curved LED display designed and developed for mission-critical control & command centres. Its curved shape offers a wide viewing angle and sharp content and supports multi-window display.

Its dynamic control system allows multi-level user management for advanced operations and meets strict EMC Class B certification requirements. The WP Arc series is an ideal solution for command centres, monitoring & dispatching centres, and more.

120° curved LED display.

Indoor applications

Pixel Pitch	1.2, 1.5, 1.8, 2.3, 2.5, 3.1mm
Brightness	600 - 1500nits
Cabinet size (WxHxD)	600x337.5x57.6mm
