

SCREEN YOUR BRAND

LED display solutions for DOOH

Inspiring screens for engaging your audience

Transform the way customers see your business. DOOH advertising displays allow brands to be seen, enhance their reputation, generate traffic at points of sale and stand out from the competition.

To gain engagement with your customers, you must offer excellent visibility, expert execution and dedication to customer success in order to secure confidence in your technology and services.

When it comes to digital signage displays, the strength of visualisation is to combine technical characteristics with aesthetic and marketing needs, creating realistic views of the results.

SCREEN YOUR SPACES

Screens and content united to cause impact

Reach your audience at the right place and moment every time. INFiLED displays are the best canvas to promote, inform and inspire.

Commercial and corporate buildings

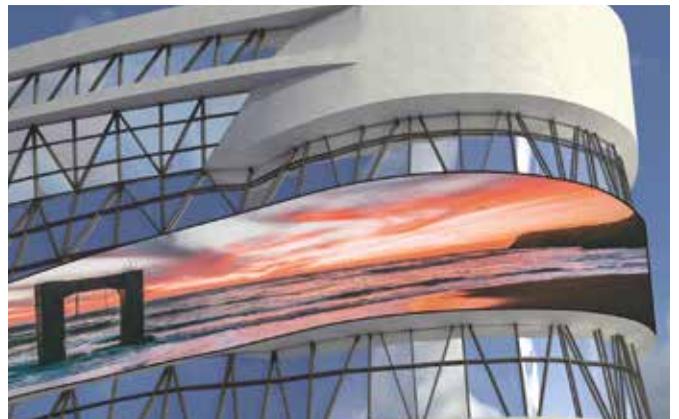

The first contact with your audience: workers, customers, suppliers and visitors. Customised displays allow the communication of corporate or brand messages in a visually engaging way.

Airports and transport

In transport and high-traffic venues, DOOH displays provide interactive advertising for multiple brands, increasing engagement and revenue.

Travellers, as well as passers-by, can view diverse content delivered in a visually engaging format.

Retail & shopping

At retail stores and shopping centres, INFiLED's DOOH solutions highlight goods and services to increase sales and build brand awareness.

Hospitality

Hotels, restaurants and spas seek to enhance their guests' stay. Large format screens offer a memorable experience.

Turn your outdoor space into an immersive experience

INFiLED displays are the best canvas for creating inspiring immersive experiences for everyone.

Sporting venues

Sporting venues have been using displays for some time to show scores and capture great moments.

Our solutions provide new ways of using digital signage to build up fan engagement and excitement and offer better sporting experiences.

HUMAN CENTRIC SCREENS

Engage your customers

At INFiLED we use technology for people through an informing and entertaining visual experience, making your message stand out.

Immersive experiences

Out-of-home displays require more effective solutions that allow companies to create engaging experiences for their audiences; informing and entertaining as well as assisting and guiding guests and enhancing the customer experience. Screens can be placed in high-traffic areas to make shopping experiences more enjoyable and any venue easier to navigate.

High visual performance

All INFiLED solutions offer the highest performance in the visual reproduction of content and an extremely comfortable viewing experience, being the best medium for all your display content.

Our screens are a reliable and robust choice under any light and weather conditions.

Flexibility

These screens with creative shapes and excellent colour accuracy create unique visual effects and provide an eye-catching experience for the audience.

Technology allows the development of tailor-made display solutions to suit all kinds of weather conditions and environments.

Sustainability

Aware of the need for sustainable development, at INFiLED we work on more energy-efficient solutions.

Excellent thermal management of all the display's electronic components allows faster heat dissipation and energy saving, extending its service life.

CUSTOMIZED DISPLAY SOLUTIONS

If you can create it, you can display it

Boosting customer engagement and purchases around the world with our customised solutions, designed for diverse conditions and environments.

High visibility in any conditions

All INFILED solutions offer excellent visual performance with a high refresh rate and extraordinary colour expression even in the most challenging conditions.

Modular systems

Modular compositions can be adapted to the specific needs and formats of each display.

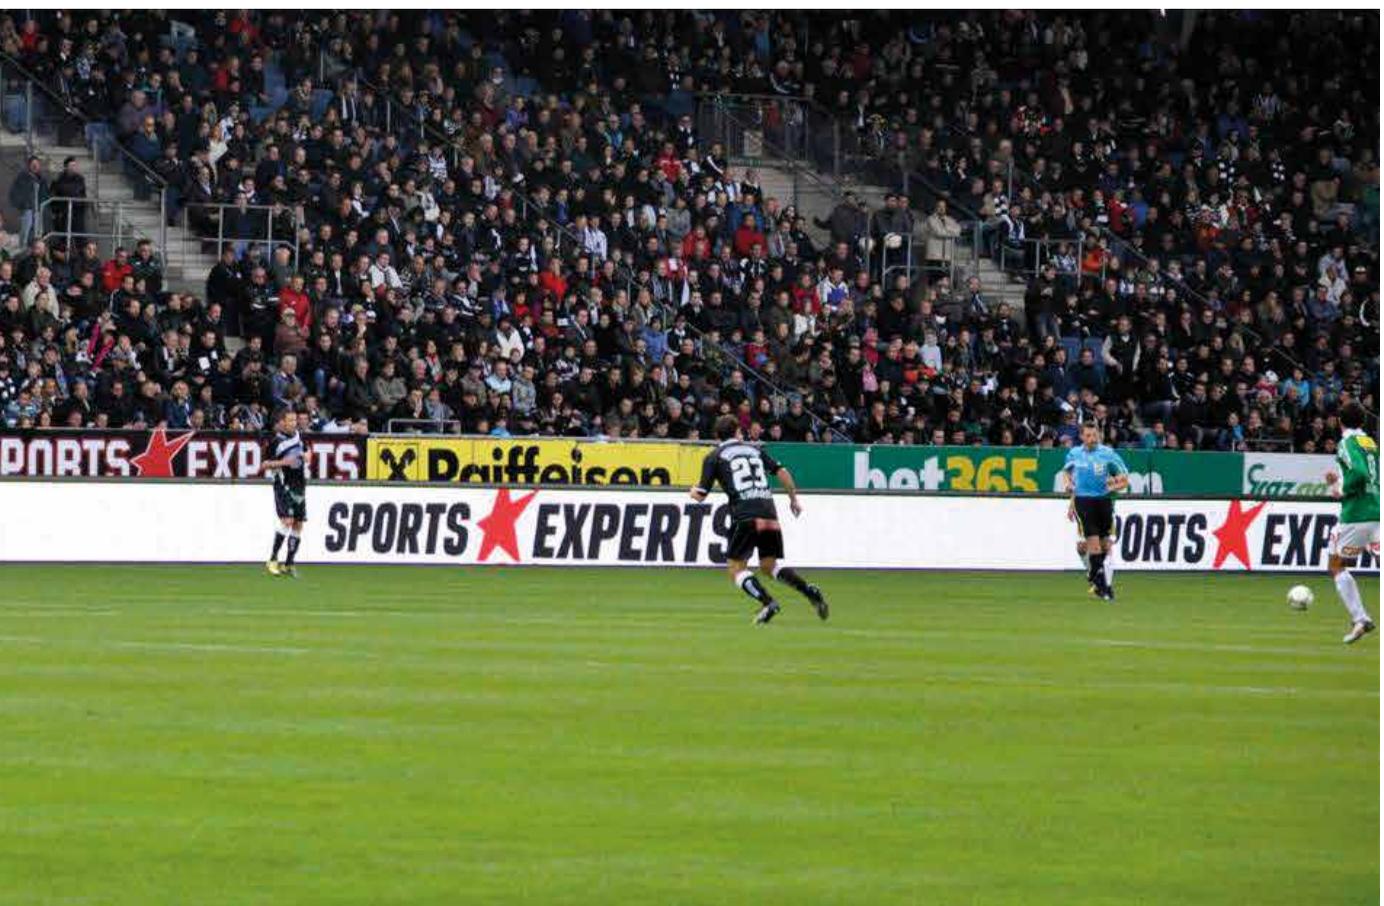

Thin & lightweight

Designed with an aluminium profile system frame that is much more durable and stable than traditional magnesium panels.

Durability

Made resistant to perform in variable weather conditions and subjected to wet and corrosive elements. Front and rear IP65 waterproofing levels ensure smooth and reliable operation under variable and extreme weather conditions.

Smart solutions

The Global Display Monitoring System (DMS) allows remote live monitoring of the screen's key working conditions and functionality, from anywhere in the world.

Easy service access

Easy front and rear access for maintenance of any module.

Better consumption

Lower power consumption makes it ideal for energy saving in all day operating solutions, extending its lifespan.

Showcase your world in infinite ways

Outstanding DOOH display solutions for a wide array of applications in all different areas and environments.

MV SERIES

Lightweight yet robust, high-performance, good value for money LED solution for fixed indoor and outdoor installations.

The MV Series is a value-added solution suitable for a wide range of fixed advertising applications, including city squares, commercial pedestrian zones and transport hubs. Featuring a slim and lightweight aluminium profile system frame, the MV Series offers an ideal balance between weight and durability to withstand harsh environmental factors

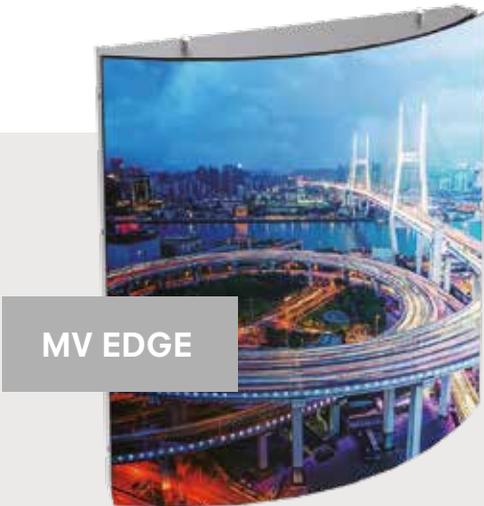

such as direct UV rays, varying temperatures, constant vibrations and severe weather conditions.

A reliable choice for DOOH providing exceptional and vivid image quality with high brightness, high refresh rate and high contrast under any light condition.

Fixed indoor and outdoor installations

Pixel Pitch	Indoor: 2.9, 3.9, 5.9, 7.8mm Outdoor: 2.9, 3.9, 5.9, 6.9, 7.8, 10.4, 12.5mm
Brightness	1.000 - 10.000nits
Cabinet size (WxHxD)	500x500, 500x1000, 1000x500, 1000x1000mm

The MV EDGE series is a great solution for installations requiring smooth curves and comes as an addition to the standard INFiLED MV series. It is designed for fixed outdoor convex applications.

Each module measures 125x250 mm, allowing it to form smooth curves while connected seamlessly to a larger flat MV LED display. High brightness, high contrast ratio and high refresh

rate guarantee clear and sharp images under any light conditions. With a low power consumption of just 180 W/m², the MV EDGE series is an energy-efficient and cost-saving solution. A reliable choice for DOOH which provides exceptional and expressive image quality with high brightness, refresh rate and contrast under any light condition.

Pixel Pitch	5.9, 7.8, 10.4mm
Brightness	5.000nits
Cabinet size (WxHxD)	1000x1000x92mm
