

SCREEN AN EXPERIENCE

LED display solutions for retail

Inspiring screens for boosting brands

For a memorable shopping experience and for customers to be attracted and connected, we must create a unique immersive atmosphere that transports them to the essence and values of each brand.

Our display solutions improve the entire shopping experience, from the appeal of the first visual contact, to help and guidance in decision making with real-time information and promotions.

Screens are not just a one-way communication channel; all retailers, shops, malls and department stores can use them as a direct way to transmit personalised content and messages, receiving feedback from shoppers.

SCREEN YOUR SPACES

Screens and brands united to communicate

Screens are meeting points for communicating concepts and ideas, connecting us to a unique and authentic brand story. The more you can tell customers about who you are, the more engaged they become.

Shopping Centres

For branding, it is important to make the space aesthetically unique. Our solutions offer excellent picture quality and can be customised with the space design. They brighten up the space and maximise the advertising effect.

Luxury Brand Stores

Luxury brands must draw attention to their brand or products in an elegant and subtle way, even from the exterior. Catch the eye of the most selective customers with our exceptional quality high-definition solutions.

Retail Stores

Video walls with high definition and thin bezels can present a variety of immersive advertisement images, while signage of various sizes can help increase sales by offering customised promotions in real-time through BLE and NFC.

Supermarket Chains

Enable customers to check promotions and products easily and quickly with large screens and excellent picture quality.

Turn your retail space into an immersive experience

INFiLED displays are the best canvas for creating inspiring immersive experiences for everyone. Shopping is becoming an interactive high-tech experience and we offer solutions to suit every environment.

Network control room

Remote monitoring of screens with real-time diagnosis, so employees can stay focused on their tasks. Offer quick solutions to technical or maintenance issues during business hours and avoid any negative impact.

Pharmacies, Travel Agencies, Telecom Stores

High-visibility displays which guide and help the customer with relevant and real-time information.

HUMAN CENTRIC SCREENS

Make it unique

At INFiLED we use technology for retailers to create their own unique environment, improving the engagement and perception of the brand.

Immersive experiences

Today's retail spaces require more effective communication solutions that allow brands to connect and empathise with their audiences. Orchestrate your screens through the shopping experience to create unique immersive environments.

High visual performance

All INFiLED solutions offer the highest performance in the visual reproduction of content and an extremely comfortable viewing experience, offering the ideal medium for all your storytelling. Our screens are a reliable and robust choice under any light and weather conditions.

Flexibility

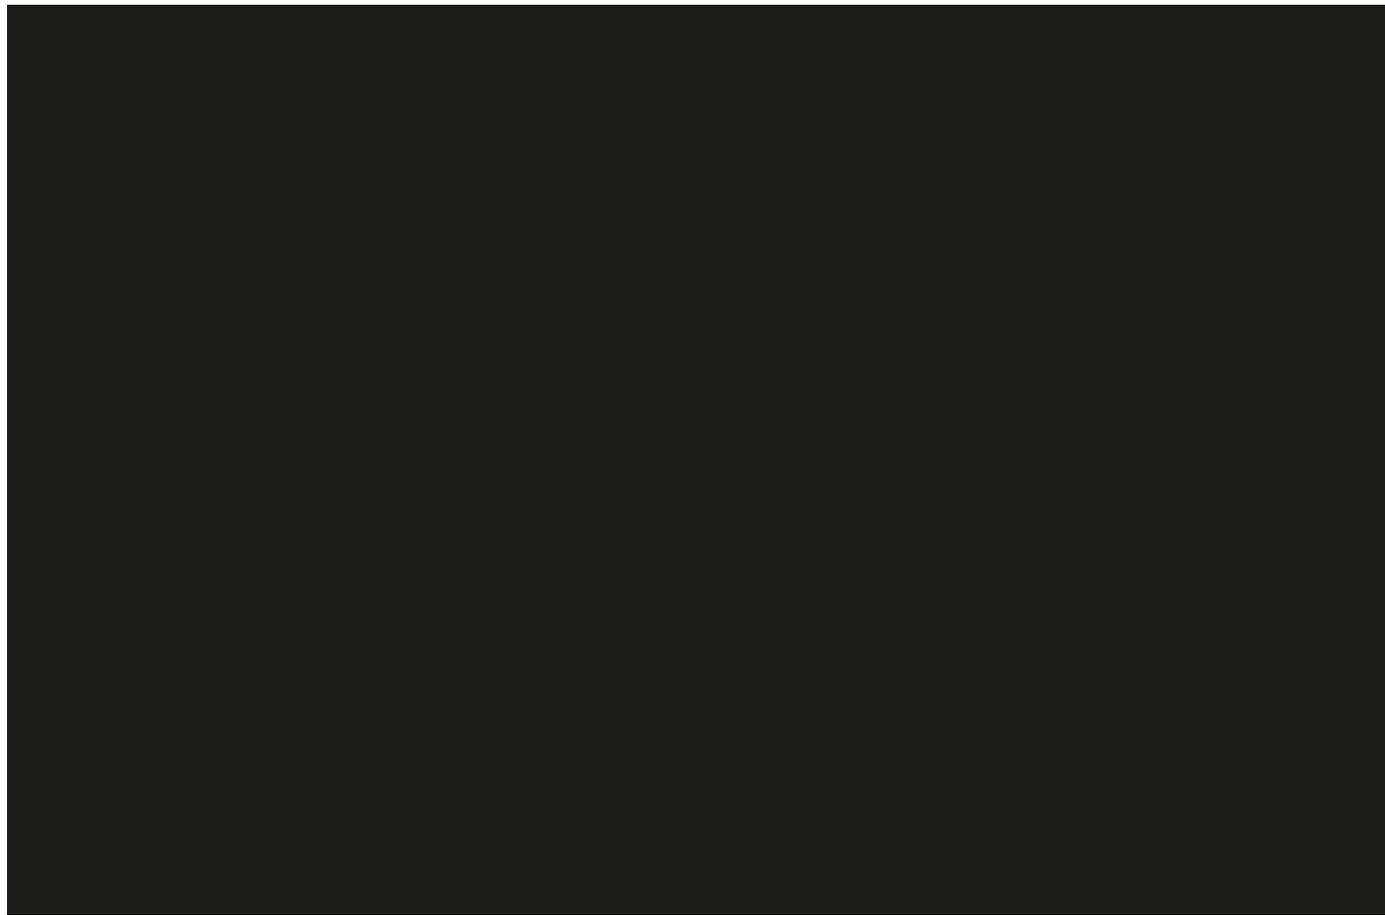

Easy installation, easy set-up and easy operation, all there to improve professional and end-user display needs. Technology enables the development of tailor-made display solutions to suit all kinds of retail spaces.

Sustainability

Aware of the need for sustainable development, at INFiLED we work on more energy-efficient solutions. Excellent thermal management of all the display's electronic components allows faster heat dissipation and energy saving, extending its service life.

If you can envision it, you can display it

INFiLED solutions can be adapted to all kinds of retail spaces, offering custom-made display possibilities for all stages and moments of the shopping experience.

Visual accuracy

Customised screens with excellent visual performance, high refresh rate and outstanding colour expression.

Flexible design

Modular compositions can be adapted to the specific needs and formats of each retail space.

Durable & Lightweight

Exceptionally light frame but robust and durable design that simplifies both transport and installation.

Our screens can be adapted to your concept-store design and brand guidelines, offering high-performance visuals and great immersive experiences.

Easy service access

Exceptionally light frame but robust and durable design that simplifies both transport and installation.

Energy saving

Low heat dissipation and low power consumption offer a more sustainable option for any project.

Showcase your world in infinite ways

Outstanding immersive display solutions for a wide array of applications in all different areas and retail spaces.

WP SERIES

WP series is INFILED's flagship fine pixel pitch, ultra-thin, high-resolution digital LED display.

The all-in-one design is the perfect solution for any installation requiring ultra-high definition.

With a panel ratio of 16:9 and pixel pitch ranging from 0.9 mm to 3.1 mm, configurations of 2K, 4k, and 8K resolution displays can be easily achieved.

Ultra-thin with integrated controller and standard 16:9 aspect ratio. Optional power redundancy.

Indoor applications

With an ultra-thin edge thickness of just 29.5 mm, lightweight modules, and an intuitive slim-line mounting system, the WP series saves space for demanding environments.

The WP series features front service modules for efficient hassle-free maintenance, resulting in minimal screen downtime.

Pixel Pitch	0.9, 1.2, 1.5, 1.8, 2.3, 2.5, 3.1mm
Brightness	600 - 1,500nits
Cabinet size (WxHxD)	600x337.5x29.5mm, 300x337.5x29.5mm

XII SERIES

The XII series is an ideal option for creative LED installations featuring extremely smooth curves and wide viewing angles. With a curve angle that can reach up to $\pm 30^\circ$ and 7 position adjustment gears, it can adapt to unlimited installation possibilities.

The XII series combines innovative design and patented modules, making possible to replace the control unit without tools for easy use and maintenance. Highly flexible, ultra-thin and lightweight, the XII series is an ideal curved LED display.

Smooth curve up to $\pm 30^\circ$ and 7 position adjustment gears.

Indoor applications

Pixel Pitch	1.9, 2.9mm
Brightness	1,000nits
Cabinet size (WxHxD)	500x500x76mm

PRODUCT RANGE

DFII SERIES

The DFII series is a digital floor solution with high load-bearing capacity, quick disassembly and increased cabinet protection. The anti-reflective and anti-slip surface provides perfectly uniform blacks and great visual performance under any light condition and at wide viewing angles. The cabinets come flat and require a simple adjustment of the height of the feet to create a straight digital interactive dance floor even on rough and uneven surfaces.

Lightweight dance floor. Fast assembly and easy maintenance.

Indoor applications

Pixel Pitch	3.9, 5.9, 7.8mm
Brightness	3.000nits
Cabinet size (WxHxD)	500x500x83.3mm

MV SERIES

Pixel Pitch	Indoor: 2.9, 3.9, 5.9, 7.8mm Outdoor: 2.9, 3.9, 5.9, 6.9, 7.8, 10.4, 12.5mm
Brightness	1.000 - 10.000nits
Cabinet size (WxHxD)	500x500, 500x1000, 1000x500, 1000x1000mm

SF SERIES

Lightweight yet robust, high-performance, good value for money LED solution for fixed indoor and outdoor installations.

The MV Series is a value-added solution suitable for a wide range of fixed advertising applications, including city squares, commercial pedestrian zones and transport hubs. Featuring a slim and lightweight aluminium profile system frame, the MV Series offers an ideal balance between weight and durability to withstand harsh environmental factors such as direct UV rays, varying temperatures, constant vibrations and severe weather conditions.

A reliable choice for DOOH providing exceptional and vivid image quality.

High brightness, high refresh rate and high contrast under any light condition.

Fixed indoor and outdoor applications

The SF series is the smart solution for creative applications. The INFiLED SF series features a special, soft but durable PCB, which is highly flexible and allows you to create convex and concave curved displays.

SF panels are super lightweight and easy to assemble with no tools required, and the advanced magnetic system enables easy front accessibility and maintenance. With an optional stacking and hanging system, it is a perfect solution to adapt to different structures and environments.

Pixel Pitch	1.9, 2.5, 4.6, 6.6, 10mm
Brightness	1.000- 1.200nits
Cabinet size (WxHxD)	320x160mm
